Δημιούργησε ένα δωρεάν λογαριασμό

The image displays the Mendeley website and its desktop application. The website header features the Mendeley logo, navigation links for 'Sign In', 'Create account', and 'Download', and a central banner with the text 'Meet Mendeley Your Reference Manager'. Below this, it lists features: 'Manage References', 'Cite and Generate Bibliographies', 'Organize Your Papers', and 'Word and Libre Office plugins'. A prominent red button says 'Sign up for free', followed by the text 'Available for Windows, Mac and Linux' and 'Or simply sign in to use Mendeley Web for free'.

The desktop application window, titled 'Mendeley Desktop', shows a sidebar with 'MY LIBRARY' and 'GROUPS' sections. The main area displays a table of documents under the 'All Documents' tab. The table has columns for Authors, Title, Year, Published In, and a rating. The first document is highlighted.

Authors	Title	Year	Published In	Ad
Appelhans, Tim; Mwangomo, Ephraim; H...	Evaluating machine learning approaches for the interpolation of monthly air temperature at Mt. Kilim...	2015	Spatial Statistics	10
Tercan, Hasan; Guajardo, Alexandro; Heinisch, Jul...	ScienceDirect Transfer-Learning : Bridging the Gap between Real and Simulation Data for Machine Lea...	2018	Procedia CIRP	10
LeCun, Yann A.; Bottou, Léon; Orr, Genevieve B.; ...	Efficient backprop	2012	Lecture Notes in Computer Science (in...	Ju
Rumelhart, David E.; Hinton, Geoffrey E.; Willi...	Learning representations by back-propagating errors	1986	Nature	Ju
Hochreiter, Sepp; Uergen Schmidhuber, J	LONG SHORT-TERM MEMORY	1997	Neural Computation	Ju
Zaremba, Wojciech; Sutskever, Ilya; Vinyals, ...	Recurrent Neural Network Regularization	2014	ICLR	Ju
Gregor, K; Danihelka, I; Graves, A; Wierstra, D	DRAW: A Recurrent Neural Network For Image Generation	2015	arXiv preprint arXiv: ...	Ju
Coates, Adam; Arbor,	An Analysis of Single-Layer Networks in	2011	Aistats 2011	Ju

The right sidebar shows details for the selected document: 'Type: Journal Article', 'Evaluating machine learning approaches for the interpolation of monthly air temperature at Mt. Kilimanjaro, Tanzania', 'Authors: T. Appelhans, E. Mwangomo, D. Hardy...', 'Journal: Spatial Statistics', 'Year: 2015', 'Volume: 14', 'Issue: 1', and 'Pages: 91-113'.

Mendeley Desktop

The screenshot displays the Mendeley Desktop application window. The interface is divided into several sections:

- Top Bar:** Includes window controls (Mac OS style) and a search bar.
- Left Sidebar:**
 - MENDELEY:** Links to Literature Search and Mendeley Suggest.
 - MY LIBRARY:** A list of folders and filters including All Documents, Recently Added, Recently Read, Favorites, Needs Review, My Publications, Unsorted, Economics, Example, History, New Horizons, Nihilism, Philosophy, Politics, Testing for Advisor, and Create Folder...
 - Filter by My Tags:** A list of tags such as All, Altmetrics, demo, fluid, fluid dynamics, logrank, Mendeley, NASA, no idea, Philosophy, Philosophy of History, project x, Rosetta, senses, Space, speech, tagging, tags, and technology.
- Main Panel:** A table titled "All Documents" with columns for Authors, Title, Year, Published In, and Added. The table lists various documents, with "New Horizons: From Research Paper to Pluto" by P. Tavner selected.
- Right Panel:** A detailed view of the selected document, showing the title "New Horizons: From Research Paper to Pluto", author "P. Tavner", year "2015", and an abstract. It also includes fields for Tags, Author Keywords, City, Institution, URL, Catalog IDs, DOI, and Files.

At the bottom of the window, a status bar indicates "1 of 161 documents selected".

Mendeley Web

The screenshot displays the Mendeley Web interface. On the left, a sidebar contains navigation options: 'MY LIBRARY' (with 'All Documents', 'Favorites', and 'My Publications'), 'FOLDERS' (with 'Create Folder...' and a list of folders including 'Economics', 'History', 'New Horizons', 'Nihilism', 'Philosophy', and 'Politics'), 'GROUPS', and 'TRASH'. The main area shows a list of documents. The first document, 'New Horizons: From Research Paper to Pluto' by Tavner P (2015), is selected. The right panel shows the 'Details' view for this document, including a 'Report' section with an 'Edit' button, a paragraph of text about the New Horizons mission, and a 'URLS' section with a link to 'www.mendeley.com/new-horizons.pdf'. A file upload area with a cloud icon and the text 'Click or drag file here' is also visible.

Document Title	Author(s)	Year	Date Added

☐ Abstract:
Global studies of transcript structure and abundance in cancer cells enable the systematic discovery of aberrations that contribute to carcinogenesis, including gene fusions, alternative splice isoforms, and somatic mutations. We developed a systematic approach to characterize the spectrum of cancer-associated mRNA alterations through integration of transcriptomic and structural genomic data, and we applied this approach to generate new insights into melanoma biology. Using paired-end massively parallel sequencing of cDNA (RNA-seq) together with analyses of high-resolution chromosomal copy number data, we identified 11 novel melanoma gen...

New Horizons

The New Horizons mission received approval in November 2001¹. Its objective was to send a spacecraft to Pluto - the only unexplored planet (still recognized as a planet at that time) in the solar system. Previous missions intended to reach Pluto - including Pluto Fast Flyby and Pluto Kuiper Express - had been cancelled, but after a thorough new profile selection process, NASA committed to launching New Horizons as part of its New Frontiers program.

Due to the distances involved - New Horizons would have to cover nearly three billion miles to reach its orbit - it was designed to have as little mass as possible, but would be launched using the huge Atlas V expendable launch vehicle. This guaranteed the greatest possible velocity for the craft.

When the mission launched on 19 January 2006, the probe left Earth on a solar system escape trajectory of 37,000 mph. It crossed the Moon's orbit just eight hours and thirty-five minutes after lift-off, and reached Jupiter 78 days later. The probe gained a gravity boost from the gas giant Jupiter to accelerate past 51,000 mph, but it took over eight years to travel to its objective. New Horizons is expected to make its closest approach of Pluto on July 14, 2015².

Phoning Home

Communicating with a probe three billion miles from Earth poses a number of challenges for the New Horizons team. Luckily, they can rely on NASA's Deep Space Network

1. Radioisotope Thermoelectric Generator (RTG)
Provides electrical power produced by the decay of plutonium-238 fuel.

2. Alice
A sensitive ultraviolet imaging spectrometer used to study atmospheric composition and structure.

3. Ralph
Imaging apparatus used to photograph and map surface details during the encounter.

4. Venetia Burney Student Dust Counter (SDC)
Designed by students at the University of Colorado at Boulder. Measures concentration of dust particles.

5. Long Range Reconnaissance Imager (LORRI)
Camera and telescope apparatus used to take photos of target at longer ranges.

6. Solar Wind Around Pluto (SWAP)
Instrument used to measure solar wind activity in the vicinity of Pluto. Also measures atmospheric escape.

7. Pluto Energetic Particle Spectrometer Science Investigation (PEPSSI)
Directional energetic particle spectrometer. Used to study energetic particles in Pluto's atmosphere.

8. Radio Science Experiment (REX)
Performs radio science experiments on Pluto's atmosphere.

Βοήθεια...;

An abstract graphic design featuring a teal background. A large red circle occupies the left side. Overlapping this and extending towards the right are several other circles: a large orange circle, a medium brown circle, a medium green circle, a small purple circle, and a small pink circle. The circles overlap in a way that creates various shades of their respective colors. The text "Βοήθεια...;" is written in white on the red circle.
