

# Streamline access. Save researchers time. Stop wasted effort.

Our SaaS Suite of products works together to bring the best in content, technology and user experience to improve research for your library end-users.

## Stacks

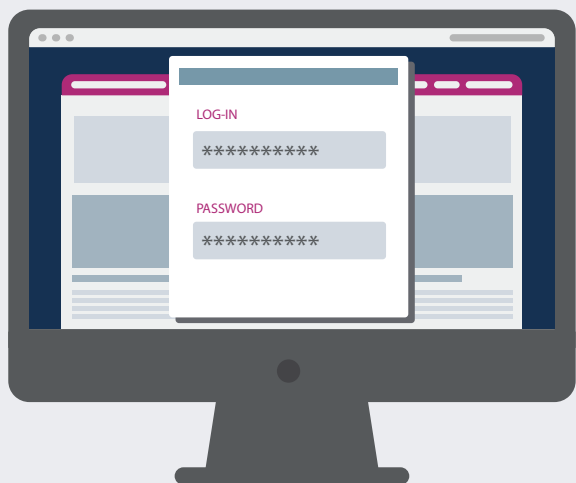

Create a world-class research experience with this library-centric CMS platform.

- Provide an optimal library research experience on any device
- Connect students and faculty to the right content with highly configurable search options
- Engage users with interactive features including Events Management, Room Bookings and Easy Forms

## EBSCO Discovery Service™

Utilize an advanced search and discovery platform to surface the most relevant information to researchers – from both paid and internal resources.

- Surface direct access to full-text articles
- Help connect library users to exactly what they are looking for with features and functionality designed to enhance search
- Maximize your catalog with ILS integration

## OpenAthens

Reduce frustration by offering single sign-on technology to provide secure access to all your personalized electronic content.

- Allow the end-user to move from resource to resource without re-entering their credentials
- Provide seamless access to content wherever your researchers are located
- Utilize usage statistics to evaluate resources
