

At a Glance - Panorama and Panorama Essentials

Panorama is a next-generation analytics platform, combining data sets from different library and campus systems enabling insights that were not previously possible. The platform is built with modern analytics technologies, features best in class visualization tools and provides librarians a central place to choose, analyze and display data about library users – all in a secure environment.

In addition to Panorama, we also offer Panorama Essentials for mutual customers of FOLIO.

The chart below shows what each package offers.

Feature / Functionality	Panorama Essentials (for FOLIO)	Panorama
