

Selection And Acquisition Simplified

Meet Rialto and OASIS

Find The Content You Need With ProQuest's Powerful Workflow Solutions

Whether you are responsible for selection, acquisition, or administration, we have the tools to help you be efficient and support your library's collection strategy. ProQuest offers two workflow solutions to best fit your library's needs: Rialto and OASIS. Both are available to your library at no additional cost- with no implementation, integration, or annual maintenance fees.

Rialto: Selection And Acquisition Rebuilt

Rialto is an innovative workflow solution designed for today's librarians to be a single integrated experience enabling informed, data-driven decisions. Rialto is built on Ex Libris Higher-Ed cloud platform and is essential for librarians who value **efficiency**, **collaboration**, and **ease-of-use**.

Efficiency: Rialto is integrated into Alma, creating a seamless and unified workflow from selection to acquisition and eliminating many of the previously manual steps. Using the library's Alma data, all the information you need to make decisions is at your fingertips (such as holdings and fund balances).

Collaboration: Rialto improves collaboration among library staff and faculty through real-time activity indicators on titles, shared lists, comments on lists, and more.

Ease of Use: Rialto's intuitive design is easy to navigate and quick to learn. It's easy to find the right titles through facets, ranking and search result grouping. Formats and acquisition models can be quickly sorted and ranked based on library preferences to help you make the best purchasing decisions.

Bringing A Wealth Of Content Into A Single Workflow

**40 Million
Print Books**

**3 Million
Ebooks**

Rialto and OASIS offer you access to robust print and ebook title databases with metadata from one of the most comprehensive bibliographic and cataloging knowledge bases in the industry. We also provide you with convenient access to your preferred publishers and aggregators with over 20 publisher-direct platforms available in our easy-to-use platforms. **ProQuest
OASIS**

OASIS: Powerful Support For Your Collection Strategy

OASIS is a trusted ordering system for librarians with powerful tools and broad choices to support their collection development strategy. OASIS streamlines workflows by resolving common pain points for all academic libraries. Subject specialists use OASIS to search and select from a vast database of print and electronic books and streaming video in one unified system. Acquisition librarians use OASIS to easily review the alternate formats, licensing and platform options before placing orders. Through EDI and APIs, OASIS can integrate with your library ILS and other systems.

ProQuest continues to invest in OASIS to make selection and acquisition flow smoothly and efficiently. We've recently introduced several enhancements in OASIS to make your experience faster and easier than ever before, including:

- Streamlined Search Results Page: We removed the split screen design in Search Results and streamlined the "browse row," leaving only the most relevant information for quick, easy viewing.
- Geographically restricted titles will be hidden from search results by default.
- Redesigned Pages including the Advanced Search input screen and Shopping cart / Express checkout screens to enhance workflows.
- Improved functionality to meet accessibility standards (including keyboard navigation and larger buttons)

Expert services to ease your workload

ProQuest offers a range of services for OASIS and Rialto libraries to help streamline your print and electronic book ordering workflow at no additional charge, including:

- **Around-the-clock support:** Weighing upcoming purchases? Adjusting your approval plans? Need to understand gaps or identify duplicates in your collection? Have technical issues that need to be addressed immediately? The team at ProQuest is here to help you.
- **Shelf-Ready Services:** Customized physical processing of books can include any of the following: barcodes, barcode protector bookplates, book pockets, date due slips, three-part labels, spine labels, spine label protectors, stamping, security strips, and outer book cover options.
- **Cataloging:** ProQuest offers various levels of cataloging to suit the specific needs of your library. These include WorldCat Collection Manager, Generic, Derived, Custom, and Original MARC Records.
