

Ex Libris Library Mobile App & Esploro

Placing the Library in the Hands of the Users

Give your library users the high quality mobile library experience they deserve.

The Library Mobile app is seamlessly integrated with the most important library systems, tailored to all library users – including students, faculty, staff and alumni.

- Provide branded and personalized services including search, favorites, account access, automated and scheduled push notifications and so much more
- Encourage patron engagement with features such as polls and event promotion.

ExLibris Esploro

Showcase Research and Expertise with Esploro

The Esploro research information management solution drives research impact and improves efficiencies. Highlights include:

- Smart data harvesting to automatically capture research assets and populate metadata
- Comprehensive researcher profiles
- Scholarly information – publications, preprints, creative works and awarded grants – showcased in one place.

Alma

ExLibris Alma

The Only Unified Library Services Platform in the World

Find out how to unify and simplify your library resources. With Alma you benefit from a cost-effective library management solution, centralizing management of print, electronic and digital materials.

Explore some of Alma's Key Benefits:

- A comprehensive solution to manage the full range of your library's digital content
- Eliminates the need to manually synchronize records for electronic resources into the local catalog
- Enables users and libraries to work more efficiently with automation options using artificial intelligence
- Integrates with external systems – Cloud Apps, created by and for members of the Ex Libris community, continues to grow and is used by thousands of users

Discover the most cost-effective library management solution in the industry. Alma streamlines the library management process to drive productivity, places the library at the heart of the academic ecosystem and empowers library collaboration.
