

For instructors

Transform grading into learning

Gradescope is the leading assessment and feedback platform that modernizes the grading process and transforms grading into learning.

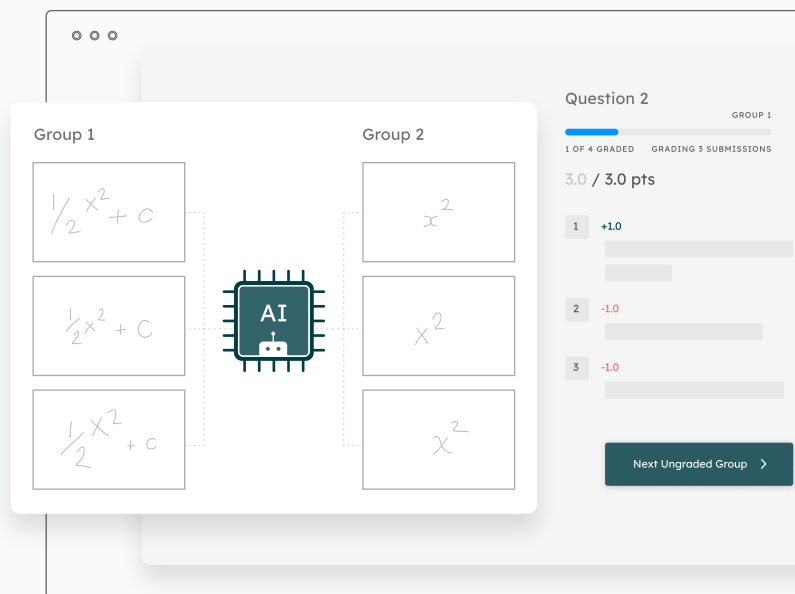

Dramatically cut grading time

Gradescope's AI-assisted grading and dynamic rubric cuts grading time in half, eliminating redundancies and providing quality feedback at scale. Instructors can use the time saved to focus on the important aspects of teaching rather than grading.

“ Gradescope is rocket fuel for grading. My students love getting feedback just a few hours after their quizzes — a pace I can only achieve with Gradescope.

Improve consistency and reduce unintended bias

Utilizing Gradescope's digital rubric helps instructors maintain consistency across all students and allows changes made to the rubric to be reflected throughout previously graded submissions. Instructors can also reduce bias by anonymizing student names and emails when grading.

“ The ease of applying a consistent grading scheme with detailed feedback was the most useful feature. I was also impressed with how easy it is to set up assignments for grading. And I LOVE not having to shuffle papers.

Michael Thompson
Baylor University

Digitize work and grade from anywhere

Gradescope restructures the traditional grading workflow. Instructors no longer need to worry about the logistical nightmares associated with transporting and returning stacks of paper, marathon grading parties, and lost class time. Students can submit their assignments directly to the Gradescope platform using the Gradescope Mobile App or if instructors prefer, they can choose to scan and upload completed submissions. From there, instructors can grade these high-quality, digitized assessments from anywhere at any time and return work quickly within Gradescope.

“ Gradescope allows me to give a short quiz every day in my section of 60 students, and grade them all on my 30 minute train ride home. The students get immediate, custom feedback that helps them understand how they’re doing in the class, and helps me monitor how things are going as well.

Jesse Tov
Northwestern University

Understand learning trends and refine instruction

Evaluate which concepts were mastered and which were misunderstood with per-question and per-rubric analytics. Instructors can also measure course-level progress and align assignment statistics with key learning objectives.

“ The statistics really help me understand what I can teach differently next time to help my students learn better.

Katie Johnson
Florida Gulf Coast University

LMS integrations

Gradescope is specifically designed to be modular and extensible, meaning that we work with the most common LMS systems and technical environments in use at your institution via an LTI integration.

Accessibility

The Gradescope team takes accessibility seriously. We are committed to making regular accessibility improvements and maintaining an updated VPAT. We strive to design components to follow compliance guidelines and are in ongoing effort to improve our design system to meet our users’ needs.

Privacy & security

Turnitin vigorously protects your personal data and works hard to achieve extremely high levels of security. We never buy, sell, or rent data, nor do we use it for marketing or advertising purposes. We collect and use personal information only to provide our services.

Support

When you partner with Turnitin, dedicated onboarding and support teams are available every step of the way—from implementation and onboarding to training and optimization. You get 24/7 global support across all timezones.

About Turnitin

Turnitin is a global company dedicated to ensuring the integrity of education and meaningfully improving learning outcomes. For more than 20 years, Turnitin has partnered with educational institutions to promote honesty, consistency, and fairness across all subject areas and assessment types. Our products are used by educational institutions and certification and licensing programs to uphold integrity and increase learning performance, and by students and professionals to do their best, original work.

About Gradescope

Gradescope by Turnitin is an assessment platform that uses leading-edge technology to dramatically reduce the pain and time associated with traditional grading. It provides integrated technology solutions to help universities, faculty, and students digitally collect, organize, and store work; streamline grading workflows for paper-based exams and assignments, online homework, and programming projects; and identify student and class trends with robust statistics and dashboards.
