Fundamental questions  
Elemental answers

# How can sustainable chemistry make a difference?

You and your research have the power to make the world a better place. If you're looking into developing new sustainable technologies, or finding cleaner chemical solutions, then we want to hear from you. *RSC Sustainability* is a dedicated forum for your quality discoveries, offering a space for research to grow and make an impact around the globe.

As an inclusive and interdisciplinary journal, *RSC Sustainability* welcomes research from all subject areas that aim to solve sustainability challenges for a better, greener future. It also complements the Royal Society of Chemistry's premier sustainability journal, *Green Chemistry*.

*RSC Sustainability* is gold open access. This means that your publications can be shared widely and accessed easily around the world. We're also paying for all article processing charges (APCs) until mid-2025 – so when you're ready to make a start, you can publish your work for free.

## Editor-in-Chief

**Tom Welton** Imperial College London, UK

Gold open access with all APCs waived until mid-2025.
