www.icicte.org

The conference seeks to address the many challenges and new directions presented by technological innovations in educational settings. It brings together an international community of scholars and practitioners in a forum setting. Opportunities for discussion on current thinking and practices in applications of technology to education are enhanced by the limited number of participants. The social events are also very memorable. You are invited to submit paper, workshop and poster proposals.

**Deadline for paper & workshop proposals
JANUARY 13, 2012**
