Webinar “Collection and Management of Geospatial Data”

By **George P. Petropoulos**

Assistant Professor, Harokopio University of Athens, Geography Department, Geoinformatics and Cartography Laboratory

Greek Academic Geographical Libraries

Description

Initially, Dr. Petropoulos will provide definitions and will insist on the importance of geospatial data. He will mention the sources, the applications, and the formats, as well as the management and the analysis software that is needed for this type of data. This speech could not miss issues related to how to read a map, geobases, but also to the multiple ways that geospatial data could be diffused.

Duration

2 hours

Language

Greek

Maximum Number of Participants

No limitations – registration is required
