

- Only license the titles that your institution needs
- All book types available including reference works and textbooks
- Includes continuous access, no DRM and unlimited concurrent users

Flexible eBook solutions
that grow with
your organization's
research objectives

What is it?

The Springer Nature Single Titles model is the most flexible way to license the titles your institution needs. Pick and choose a minimum of 20 single titles which best suit your requirements, whether you wish to complement existing eBooks or take the first step in starting a new eBook collection.

How does it work?

Simply choose a minimum of 20 eBooks or eBooks to the value of €5,000* from the Springer Nature catalogue and place your order with your Springer Nature licensing manager or via the Librarian Portal and our user-friendly online eBook selector tool.

Why choose Single Titles?

- The ideal way to start your eBook collection or add content to your existing eBook collection
- Facilitate remote learning with eBooks versions of key textbooks and course materials
- Place your order online using the eBook selector tool with flexible invoicing, allowing each title to be charged to a different department.
- Easy for users to access remotely via SpringerLink
- License comes with continuing access, no DRM and unlimited concurrent users
- Select any English/International eBooks title (including textbooks, reference works, proceeding and monographs), from any copyright year or the eBook archives.
- Take advantage of MyCopy service which allows library users to order personal, print-on-demand editions of eBooks for 24.99**
- Full book Interlibrary Loan (ILL) available

What are the benefits of licensing direct?

	Springer Nature	Aggregator
DRM Free	✓	✗
Major reference works	✓	✓
Textbooks with unlimited concurrent users	✓	✗
MyCopy	✓	✗
Full book Interlibrary Loan	✓	✗

* For local currency equivalent please contact your local licensing team.

** £24.99 / \$24.99 / € 24.99 / ¥2999. MyCopy is currently available in 31 countries please check here for details.
