# Winners of Nikolaos Bourbakis Award for 2022

IJAIT committee for the Nikolaos Bourbakis Award decided, for implementation of the award for 2022, to evaluate all regular papers published in IJAIT in 2022 as well as those in the special issue dedicated to ICTAI-20 conference.

The committee based its evaluation on the comments of the reviewers, at a first stage, and on their content (problem under study, approach followed, mathematical modeling), at a second stage. Finally, the committee decided that the following paper is the winner of Nikolaos Bourbakis award for 2022:

- **G. Drakopoulos, E. Kafeza, P. Mylonas and H. Al Katheeri**, Higher Order Trust Ranking of LinkedIn Accounts with Iterative Matrix Methods, *Int. J. Artif. Intell. Tools*, Vol. 31, No. 7, 2260001-1–23, November 2022, doi: 10.1142/S0218213022600016.

The US$500 cash award will be shared among the authors of the paper.

Congratulations to all authors of the paper!
