

PRESS RELEASE

Participation of representatives of the DIN-ECO project in the 2023 IVAP Workshop of the EIT in the framework of the HEI Initiative

On May 31 - June 1, 2023, the Workshop entitled "Innovation Vision Action Plan (IVAP) Workshop 2023" was held with great success and high attendance by the HEI Program of the European Institute for Innovation and Technology (EIT). The event took place in Prague at the emblematic Gabriel Loci building.

The Workshop gathered the members of the projects that have received funding in the first, second and third cycle (cohorts 1, 2 and 3), the executives of the Initiative's Project Management Team from the 8 Knowledge and Innovation Communities (KICs) of the EIT and other key stakeholders from EIT and DGEAC.

The aim of the event was to bring together all the Initiative's teams and projects to collaborate and strengthen their Action Plans in order to achieve the European Union's Innovation Vision. The workshop offered as part of the event had a collaborative and interactive design and helped the representatives of the consortia to better understand the Initiative (HEI Programme), as well as to ask questions of the representatives of the EIT on various issues related to the physical and economic subject of their works.

The consortium managing the DIN-ECO project - coordinated by the Ionian University and scientifically responsible Professor Adamantia Pateli - participated in the Workshop with three (3) representatives: the Rector of the University of Niš, Professor Dragan Antic, Assistant Professor Naoum Mylonas from the Ionian University and the executive Mr. Thomas Chalatsis from A.B Institute of Entrepreneurship Development LTD. The DIN-ECO project is financed by the second cycle of the Initiative (cohort 2) and continues to offer its actions dynamically in the current period.
