Dear Professor Dr. Stavros Katsios,

Warm greetings from Shandong University of Technology (SDUT)!

I wish to express my heartfelt thanks to you and your team for receiving us, the delegation from SDUT, during our visit to Greece.

Your considerate and warm reception made us feel at home. You kindly provided us a detailed introduction to your university, assisting us to know more about our cooperative prospects in people-to-people exchanges, research collaborations and joint activities and, more importantly, have full expectations for building a comprehensive strategic relationship with your university based on the outcomes of our meeting. We had a great time there, and we really appreciate everything you have done for us.

Just as an old Chinese saying goes, “seeing is believing.” Through the visit, we got a whole picture of your university and reached extensive consensus on boosting exchanges and cooperation with you, thus we highly welcome you to visit SDUT in due course so that we can reciprocate your hospitality, show you an energetic SDUT and deepen our cooperation.

Additionally, I would avail myself of the precious opportunity to extend our Season’s greetings to you and your team.

Merry Christmas and Happy New Year!

Yours sincerely,

Prof. SU Shoubo
Vice president
Shandong University of Technology
