Project is funded by Erasmus+ fund, under the reference  
2021-1-HR01-KA220-HED-000031177.

Erasmus+

Erasmus+  
WICT

Introduction of joint short-  
cycle ICT courses for better  
employability of students  
and graduates.

Co-funded by the  
Erasmus+ Programme  
of the European Union

## What is WICT?

The aim of the project is to determine the needs of employers in the private and public sectors, regarding Data Science and Artificial Intelligence skills. The project also aims to develop short-cycle courses that will assist current students and recent graduates in achieving the skills required by potential employers, in order to boost their employability in the ICT sector.

## Which countries participate in WICT?

The WICT consortium consists of five European countries—Croatia, Serbia, Hungary, Poland, and Greece. Such a wide consortium allows for a wider analysis of the industry needs and the ability for further application of the developed courses.

## What will the project output?

The project is expected to output a report on the current needs of the industry in comparison to the skills taught in academia—namely in data science and artificial intelligence fields. Following that, the deliverables of the project will include courses that aim to address the determined discrepancies.
